

UV-C SOLUTIONS FOR LARGE ENVIRONMENTS (PUBLIC AND PRIVATE)

Guaranteeing Health, Efficiency, Sustainability

In public and private venues such as theatres, conference halls, large warehouses, and supermarkets, there is inevitably a large number of people sharing the same space at any given time. Air and surfaces can easily become a mean of transmission for diseases and as a consequence, **Indoor Air Quality and disinfection of Surfaces must be a priority in order to maintain a safe and healthy environment.** UV-C technology is the most effective and sustainable solution to achieve these goals.

CUSTOM SOLUTIONS

WE TURN CHALLENGES INTO SOLUTIONS

One characteristic of UV technology is that there are **almost no limits to its application**. We are therefore available to listen to your requests and analyse the technical feasibility of the most appropriate solution for the specific situation, including custom or OEM projects.

WHY INTEGRATE UV-C TECHNOLOGY?

It improves the customer experience and general look of places with effective, silent, but also discrete and visually appealing products, effortlessly adapting to any space.

It has products for local disinfection, but also systems designed for integration in large, centralised air conditioning and ventilation systems

Combining UV-C technology with the Light Progress original TiO₂, it is also possible to eliminate bad odours and volatile pollutants

it improves the depth of cleaning and disinfection without requiring any extra time or additional actions, thanks to automatic and integrated systems

HVAC & CENTRALIZED AIR DISINFECTION

HVAC systems and AHUs must include a UV-C disinfection section, to guarantee the highest Indoor Air Quality level and safety for customers and employees.

WATER TREATMENT AND DISINFECTION

UV-C light systems are a valid solution for disinfection of water and drink dispensers, guaranteeing high levels of quality and safety of beverages without altering their sensory properties.

SURFACE DISINFECTION IN ENVIRONMENTS

Traditional cleaning methods often aren't enough to ensure the highest levels of hygiene. UV-C technology can help maintain high standards of disinfection on all surfaces.

AIR TREATMENT AND DISINFECTION

In closed spaces, air purifiers can guarantee healthier environments, reducing the rate of harmful virus and bacteria also in restaurants and hotels with a limited fresh air circulation.

SOFTWARE ENGINEERING FOR UV-C INTEGRATION

From our in-depth know-how on the subject, we have created calculation software to simulate and ensure the effectiveness of each of our systems, according to the different applications.

Software Calculation 99,99% Virus Reduction in Air Treatment
